Welcome to the Nordic Life Science Days!

Välkommen, velkommen, tervetuloa, velkomíð!
Welcome to the Nordic Life Science Days 2017!

Or welcome back! Whether you are a first time visitor or a returning delegate, you are now part of a growing community, focused on business opportunities in the vibrant Nordic life science landscape.

After four editions and growing in a rapid pace, NLSDays has become the largest invest-, partnering- and network meeting held in the Nordic region. Here you can meet and get to know everything from well-known innovative life science companies to new exciting enterprises you have never heard about before. And, not to forget, you will have the opportunity to network with key opinion leaders from the whole Nordic life science sector.

As organizers, we are keen to create a professional but yet friendly and relaxed atmosphere, optimizing your chances of having a successful meeting. We hope that you'll find your next business partner during these days. Make sure to use the partnering system and the many alternative meeting points set up during the meeting.

We want to thank all our speakers, presenters, partners, exhibitors and supporters as well as the local host committee for their continuous commitment and support, making this meeting possible.

On behalf of SwedenBIO and Bionordic, we welcome you to an interesting and productive meeting and hope to see you again at the Nordic Life Science Days 2018 in Stockholm, September 10-12!

What's all about

The Nordic life science story

The Nordic Life Science Days is the major annual life science event in the Nordics. The program, super sessions, workshops, company presentations, exhibition and surrounding activities reflects the flourishing life science sector in the region. Key message is that the Nordic countries is a strong region in life science, both academically and commercially. In the opening session, we have the honor of having Mikael Odenberg, chairman of Karolinska Institutet, Dr. Mikael Dolsten, President Word wide R&D at Pfizer and Anita Krohn Traaseth, CEO of Innovasjon Norge. They will set the stage for the conference, positioning the Nordics in the global life science landscape.

In the Nordics we see a transformation of the life science sector, where developing companies remain with very few employees and relies more on service providers instead of in house expertise. Last year 85% of the clinical stage projects were made by companies with less than 50 employees. To succeed in performing development as a small company, service providers are very important. Many of these service providers are a driving force in developing assays and processes, spending large amount on in house research. A new feature in the program this year is a session where the scientific advancements carried out by service providers are highlighted.

To start off the conference earlier the first day, two new sessions are added. The first is Academic Catwalk, where academic stars from the Nordic countries will give inspirational presentations on state of the art research that could lead to future generations of therapies. This will be followed by a Startup Challenge where startups from the Nordics will pitch their businesses in a competition. We expect the first day will be a relaxed, inspiring day with a lot of fun.

During the week of the Nordic Life Science Days, the Malmö-Copenhagen area will be the host of several affiliated events. On Monday, September 11, H2020 European Health Brokerage Event on Personalized Medicine and Biomarkers will be hosted by The French Institute together with local Nordic partners in Copenhagen. On September 12 in Malmö, a seminar with the title "Advanced Medicinal Therapy Products – A game changer in medicine?" hosted by Nordic and Japanese organizations and another seminar on "Novel solutions in chronic wound healing" by RISE and OxySolutions AS. In addition, there will be more private events hosted by embassies and companies in the region during the week.

sponsoring opportunities

No matter what is your business target, increasing your brand visibility or connecting with decision makers from the Nordic region or from abroad, NLSDays has the sponsorship opportunity that meets your needs and budget.

Whether your budget is high or low, we have multiple options that put your company or organization on the top among the most influential leaders in Nordic life science.

Here is an overview of the opportunities we can offer:

- Networking receptions
- Super Session hosting including speaking opportunities
- Partnering opportunities
- Branding (badges, lanyards, delegate bags, partnering portal, partnering booths, conference book...)

The Swedish Life Science Industry Organization

We represent the leading life science companies in Sweden!

SwedenBIO is the national association for the life science industry in Sweden with over 230 members. Our mission is to promote an environment that brings success and growth to the whole of Sweden's life science industry.

1. We expand business networks

SwedenBIO holds several inspirational meetings, round table discussions, workshops and informal get-togethers throughout the year. Vc2vc is a by invitation only meeting facilitating life science investors to meet and syndicate: more at www.vc2vc.com. The Nordic Life Science Days conference held annually in September has rapidly grown to become the largest international partnering meeting in the Nordic region. We wish you a successful meeting!

2. We build knowledge

The life science sector is experiencing a major structural change. One of SwedenBIO's objectives is to quickly distribute new knowledge — through our seminars, through information material and by linking the right people with one another.

3. We represent the industry

SwedenBIO is active in the public debate and represents the industry. We have a continuous dialogue with authorities and politicians about the industry's prospects. Thanks to SwedenBIO's six working groups with experts from our member companies, we are able to pursue a wide range of the issues.

The Swedish Drug Discovery and Development Pipeline

Every year SwedenBIO summarizes the trends, status and progress of the collective drug development pipeline of Swedish companies. Read the latest report at www.swedenbio.se/pipeline.

Bringing your event to success!

Bionordic is a global event management company, organizing and producing conferences and corporate events. It supports a large range of international clients including public and private agencies, non-governmental organizations, regional and multinational corporations.

We are part of the new Nordic life science ecosystem, being innovative, creating content and value for our customers. We conceive, produce and deliver unique events and substantial partnering and networking opportunities.

Based on cutting edge and technology solutions, we offer our clients a full in-house specialist event management service supported by a passionate team of experts focused on creating amazing events.

What we are good at: Venue sourcing - Event management - Exhibition management - Technical coordination - Cost-killing - Event business development & sales - Public/Private fundraising - Marketing & participant sourcing - Programme design - Speakers sourcing - Conference website - Abstracts applications - Online registrations & payments - Partnering platform & Face-to-face meetings - Social & community Networks.

We are proud to be the official producer of the Nordic Life Science Days, a SwedenBIO event.

Bus tour to
Lund

Seminar on drug development at MAX IV and ESS

HOSTED BY: **Invest in Skåne**

Learn how your company can benefit from the advanced research tools at MAX IV and ESS in your drug development process – from early drug discovery to formulation.

Join a one-day seminar with presentations from MAX IV and ESS as well as companies that are taking advantage of the analytical techniques available at these research facilities. You will get an insight on how these tools create value and how they can help you in developing new drugs of tomorrow.

The day will be rounded off by a guided tour to the MAX IV laboratory.

MODERATOR: **Ms. Pia Kinhult** - Strategic Advisor, ESS

SPEAKERS:

- **Mr. Stefan Johansson** - Managing Director, Invest in Skåne
- **Ms. Sindra Petersson Årsköld** - Senior Advisor, ESS
- **Mr. Tomas Lundqvist** - Life Science Director, MAX IV
- **Mr. Björn Walse** - CEO, SARomics Biostructures
- **Mr. Mathias Norrman** - Principle Scientist, Novo Nordisk
- **Ms. Anna Collén** - Senior Project Director in Pharmaceutical Sciences, Novo Nordisk

07:00 - 08:00 **Morning breakfast** Exhibition area

08:30 - 09:20 **Opening plenary** Plenary room

Co-HOSTED BY: **SwedenBIO** and **Bionordic**

The organizers welcome you all and the opening plenary marks the beginning of the 5th Nordic Life Science Days. The Nordic region have a strong history in creating environments where ideas can emerge and evolve. Today, the Nordic Life Science sector holds some of the world's most innovative and promising projects in its pipeline. Academic research flourishes, innovation blossoms, and more than 1500 companies work in this knowledge-intensive industry sector. In the same time, it's a success story that now is adjusting to the new global value chain in order to remain a success in the future. In this new value chain the big needs the small and the small needs the big, and that goes both for countries and companies. The keynote speakers will set the scene for this year's Nordic Life Science Days.

MODERATOR: **Dr. Jonas Ekstrand** - Director General, SwedenBIO

SPEAKERS:

- **Mr. Olivier Duchamp** - Managing Director, NLSDays - CEO, Bionordic Services
- **Dr. Mikael Dolsten** - President Worldwide Research and Development and EVP, Pfizer
- **Mr. Mikael Odenberg** - Chairman of the Karolinska Institutet Board

Regenerative medicine Gene therapy in regenerative medicine

HOSTED BY: **Research Institutes of Sweden (RISE)**

Co-HOSTED BY: **Business Region Göteborg and Invest in Skåne**

This supersession will focus on a specific field of regenerative medicine, gene therapy. The possibility to replace defective genes in a patient's cells with healthy ones using viral vectors and gene editing technologies, opens up the potential to treat or prevent numerous diseases which currently lack successful treatment.

Although most gene therapies are still in an experimental stage, several examples have recently been successfully translated into clinical practice and products with regulatory approval.

This session will discuss the diverse challenges involved in the translation of gene therapies to clinic and market, and highlight some successful examples.

SPEAKERS:

- **Prof. Ralf Knöll** - Chief Scientist, AstraZeneca
- **Dr. Sven Kili** - Head of Cell & Gene Therapy Development, GSK
- **Dr. Anthony T. Cheung** - Founder & CEO, enGene
- **Prof. Steffen Thirstrup** - Director Regulatory Advisory Board, NDA Reg
- **Dr. Benjamin Schmid** - Research Scientist, Disease Models, Bioneer

Response to outbreaks of emerging infectious diseases

Innovation for improving response to outbreaks of emerging infectious diseases

HOSTED BY: **CEPI**

SPONSORED BY: **Zacco**

Epidemics of emerging infectious diseases are a growing threat to life, health and prosperity. Recent outbreaks, such as Ebola and SARS, have claimed thousands of lives and cost billions of dollars. Similarly, ongoing outbreaks of Zika will pose devastating health and economic impacts for years to come. The Coalition for Epidemic Preparedness Innovations – CEPI – funds development of vaccines against emerging infectious diseases with epidemic potential, where the market incentives are limited. In addition, CEPI will fund development of vaccine platforms which can rapidly be adapted to newly emerging pathogens with epidemic potential.

Innovation by can play a significant role in epidemic preparedness. How can we innovate to be prepared to stop outbreaks of emerging infectious diseases before they become epidemics or pandemics? CEPI– invites the Nordic life science sector to a discussion on how we can use the experiences from recent outbreaks to plan for preparedness against known and unknown epidemic threats.

MODERATOR: Dr. Gunnstein Norheim - Senior Scientist, Norwegian Institute of Public Health

SPEAKERS:

- **Dr. Ana Maria Henao Restrepo** - Medical Officer, Department of Immunization Vaccines and Biologicals, WHO
- **Dr. Georges Thiry** - Acting Director of Vaccine Development, CEPI
- **Dr. Anders Hjelmencrantz** - Partner and European Patent Attorney, Zacco

Arthur D Little

Financing of lower-priority clinical trials A new mechanism to fund excess clinical stage projects

HOSTED BY: **Arthur D. Little**

SPONSORED BY: **DNB**

Some biopharma companies have built pipelines that offer more development opportunities than their resources allow them to pursue. Promising clinical trials may be moved down the priority list and their execution delayed – resulting in decline of asset value against a fixed patent expiration date. One potential solution is to package complementary trials and bring them into collaboration with investors, CROs or other organizations and fund the execution of these trials outside the biopharma company. There are several potential advantages of this approach.

But this session will also reflect upon questions like: What would be the primary driving forces for different parties to engage in this type of collaborations? Are there also complications with the phenomenon? How does the excess of promising assets with large biopharma companies affect other parts of the life science ecosystem?

MODERATOR: **Ms. Ulrica Sehlstedt** - Partner, Arthur D. Little

SPEAKERS:

- **Mr. Ben van der Schaaf** - Principal, Arthur D. Little
- **Dr. Birgitte Volck** - Vice President, Head of R&D Rare Diseases, GSK
- **Mr. Jo Sawyer** - Head of External Partnerships, Novartis
- **Mr. Jacob Gunterberg** - Partner, HealthCap
- **Mr. Olof Pierrou** - Managing Director, Investment Banking Division, DNB

15:45 - 17:00

Workshop 2

Room E

Intellectual property (IP)

HOSTED BY: **Potter Clarkson**

Patents and other intellectual property rights (IPRs) are crucial to the success of most life science ventures. Developing an effective IPR strategy to support your company's commercial objectives is vital.

In this session, Steve Smith will discuss tips and best practices for developing an effective IPR strategy, covering both your company's rights and third party rights. Next, Oliver Laing will share his expertise on how best to negotiate collaboration agreements, patent licences and other key IPR-focussed agreements. Then, Mats Grahn will provide an insight into how Immunovia has been able to use IPRs to achieve its commercial objectives. The talks will close with an interactive Q&A session.

SPEAKERS:

- **Mr. Mats Grahn** - CEO, Immunovia
- **Mr. Olivier Laing** - Senior Associate, IP Solicitor, Potter Clarkson
- **Dr. Steve Smith** - European Patent Attorney, Potter Clarkson

Value creation in service providers

HOSTED BY: **SwedenBIO**

SPONSORED BY: **Covance**

Many of the service providers in life science R&D have their own research. They provide much more than just an extra pair of hands and they spend high amounts on in house development of their services.

With this super session, we will highlight their efforts and importance for the life science ecosystem where many of the companies are small and source for the latest technologies for their research and development.

MODERATOR: **Dr. Christina Herder** - Board Member, PCI Biotech AS and Idogen AB

SPEAKERS:

- **Mr. Andy Gibbs** - Drug Development Leader, Covance
- **Mr. Sverre Bengtsson** - CEO, Pharma Consulting Group
- **Dr. Torkel Gren** - Senior Sales Director, Development Services, Recipharm
- **Dr. Michael Dabrowski** - CEO, Pelago Bioscience

Innovative Medicine Initiative (IMI)

The innovative medicine initiative: speeding up medicines development through open research collaboration with the pharmaceutical industry.

HOSTED BY: **Vinnova**

CO-HOSTED BY: **Danish Agency for Science and Higher Education**

Research collaboration and funding opportunities for SMEs, Research Institutions, Hospitals and other stakeholders in the area of medicine development.

The Innovative Medicine Initiative (IMI2) is Europe's largest public-private partnership in life science. It is jointly run and funded by the European Commission and the European Federation of Pharmaceutical Industries and Associations (EFPIA). Its aim is to improve the process of developing new drugs and treatments by supporting cooperation in research and development. IMI projects address such themes as preclinical and clinical methodological advancements, Digital Health, personalized medicine, Diabetes, Neurosciences and Oncology.

The event is organized by VINNOVA, the Danish Agency for Science and Higher Education and The Research Council of Norway.

Who should join this session?

The workshop is an opportunity for a wide range of stakeholders – not least small and medium sized companies – to learn about the opportunities for R&D collaboration with the European pharmaceutical industry through IMI funded projects. The workshop will highlight the experiences and learnings of Swedish and Danish IMI project participants from both industry and academia.

Super session 7Plenary
room**Transformative oncology****Advancing cancer immunotherapy by novel partnerships, bugs and bytes**HOSTED BY: **Oslo Cancer Cluster**SPONSORED BY: **DNB**

The session gathers a group of experts with complementary expertise to present and discuss recent approaches in cancer immunotherapy. Tremendous scientific progress resulted in real clinical breakthroughs and a growing number of cancers are now successfully treated with immunotherapy. However, many challenges remain and for tackling these collaborations among various disciplines is essential.

A set of compact presentations will highlight how players from pharma, biotech and academia advance the field and what we can learn from microbiologists and machine learning experts.

MODERATOR: **Ms. Benedicte Bakke** - Senior Advisor, International Healthcare, DNB

SPEAKERS:

- **Dr. Khatereh Ahmadi** - Executive Director, Oncology Search and Evaluation Lead, MSD
- **Dr. Per Norlén** - CEO, Alligator Bioscience

The Nordic capital landscape

HOSTED BY: **Chalmers Ventures**

SPONSORED BY: **Novo, Industrifonden, Nasdaq and PRV Swedish Patent and Registration Office**

The Nordic countries is by tradition holding a leading position in the life science industry, based on new innovative products. But the industry ecosystem is quickly changing and the industry does not today look as it did fifteen or even ten years ago. There are still some big pharma's operating in the region, but the greater part of the companies in the sector are smaller startup companies. These small companies are playing a more important role for the industry today, but almost every single company aims to be sold to a big pharma before the product is fully developed.

How is the Venture Capital landscape in the Nordic region set to meet the new circumstances, especially in the earlier phases where the money is more regional than in the later phases and for the more mature companies? And what do the companies needs more than money from the Venture Capital in the future?

MODERATOR: **Mr. Pontus Ottosson** - Head of Investments, Chalmers Ventures

SPEAKERS:

- **Ms. Anna Danestig** - Key Account Manager, PRV
- **Dr. Yilmaz Mahshid** - Investment Manager Life Science, Industrifonden
- **Dr. Stephan Christgau** - Partner, Novo Seeds

Nordic Stars Awards & Closing address

CO-HOSTED BY: **Bionordic** and **SwedenBIO**

SPONSORED BY: **Arthur D. Little**

Time for summing up and present a few of the highlights from Nordic Life Science Days 2017. Another, important part of the closing session is to announce the winners of the Nordic Stars Awards 2017.

The Nordic Stars Awards were established in 2013 with the purpose of rewarding particularly innovative companies belonging to the innovative Nordic life science community. The winners will give their view on how they are preparing for the future.

MODERATOR: **Dr. Jonas Ekstrand** - Director General, SwedenBIO

SPEAKERS:

- **Mr. Nils Bohlin** - Partner & Global Leader Healthcare, Arthur D. Little
- **Mr. Olivier Duchamp** - Managing Director, NLSDays - CEO, Bionordic Services
- **Dr. Björn Ursing** - Program Director, SwedenBIO
