Novo Nordisk was founded in 1923, shortly after the University of Toronto granted August and Marie Krogh permission to produce insulin in Scandinavia

Driving change since 1923

For almost a century, we have been dedicated to improving the lives of people living with serious chronic diseases. Today we continue to innovate by pioneering scientific breakthroughs, expanding access to our medicines and working in partnership to prevent – and ultimately one day cure – the diseases we treat.

Welcome to the Nordic Life Science Days!

Välkommen, velkommen, tervetuloa, velkomíð!
Welcome to the Nordic Life Science Days 2022!

Or welcome back! Whether you are a first time visitor or a returning delegate, you are now part of a growing community, focused on business opportunities in the vibrant Nordic life science ecosystem.

After eight editions and growing in a rapid pace, NLSDays has become the largest invest-, partnering- and network meeting held in the Nordic region. Here you can meet and get to know everything from well-known innovative life science companies to exciting new enterprises you have never heard about before. And, not to forget, you will have the opportunity to network with key opinion leaders from the whole Nordic life science sector.

As organizers and producers, we are keen to create a professional but friendly and relaxed atmosphere, optimizing your chances of having a successful meeting and an unforgettable experience. We hope that you'll find your next business partner during these days. Make sure to use the partnering system and the many alternative meeting points set up during the meeting.

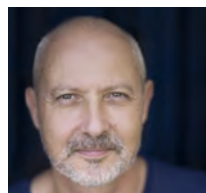

We want to thank all our speakers, presenters, partners, sponsors, exhibitors and supporters as well as the local hosts' committee for their continuous commitment and support, making this event possible.

On behalf of SwedenBIO, we welcome you to an interesting and productive meeting and hope to see you again at the Nordic Life Science Days 2023 in Copenhagen, 29-30 November!

We thank our Nordics' co-hosts

Nordic National Co-Hosts

Nordic Regional Co-Hosts

Openness, trust, innovation, sustainability and equality. Those are five values that shape the state of mind and political culture for 27 million people – The Nordics.

Year by year the Nordic life science community is evolving, and the bonds between us – the five neighboring countries – are strengthening. Today, the Nordic life science sector holds some of the world's most innovative and promising projects in its pipeline. Academic research flourishes, innovation blossoms, and more than 1500 companies work in this knowledge-intensive industry sector.

By joining forces, we believe that we can be even more successful in attracting intelligent capital and business-to-business collaborations to our life science sector.

Therefore we are very happy to see such a great interest and support from our collaboration partners making NLSDays the meeting platform it has become – and developing it further. We are also looking forward to the continued activities that goes beyond this meeting, showing the world what we have to offer.

We thank our NLSDays 2022 sponsors!

SwedenBIO proudly presents Nordic Life Science Days

SwedenBIO is the national association for the Swedish life science industry, gathering over 320 members.

We cover the entire life science ecosystem and represent companies in R&D, production, and sales in fields such as biotech, medtech, diagnostics, and pharma. We also have members focused on business development, life science communications, IP, and law.

We provide services and events in Sweden, the Nordics, and abroad. Nordic Life Science Days is our flagship event.

A photograph of a harbor scene at dusk. In the foreground, a dark wooden boat with a yellow cabin and a red lifebuoy is docked. Behind it, several other boats are visible. The background features a row of colorful buildings (blue, red, yellow) with many windows, some of which are lit up. A sign on one of the buildings reads "HAFRUE". The sky is a mix of purple, pink, and orange, reflecting on the water.

Agenda

A blurred photograph of a conference stage. In the foreground, the backs of several audience members' heads are visible as they sit in rows of chairs. The stage is brightly lit with blue and white spotlights. A speaker is visible on the right side of the stage, standing near a podium. Large screens or projectors are visible in the background, displaying abstract light patterns.

Medicon Valley Microbiome Pitch Day

COPENHAGEN
CAPACITY

GREATER
COPENHAGEN

CO-HOSTED BY: **Invest in Skåne, Medicon Valley Alliance, Copenhagen Capacity, Greater Copenhagen and Interreg Öresund-Kattegat-Skagerrak**

Medicon Valley Microbiome Pitch Day is a unique event to showcase research projects and startups in the microbiome field looking for collaboration or investment — with regional, national or international partners. It will be in-person at the Malmömässan event centre in Malmö and feature a number of exciting presentations across five hours with plenty of time for breaks and networking.

Medicon Valley Microbiome Pitch Day is a prime opportunity to attract capital or funding, meet potential partners, and tap into early-stage startups.

Power-up through partnerships - How level playing fields create a push for growth

HOSTED BY: **SwedenBIO**

SPONSORED BY: **Novo Nordisk**

In the Grand Opening of Nordic Life Science Days 2022, we will explore the various ways to successfully power up through partnerships together with Karin Conde-Knape, Senior Vice President – Global Drug Discovery at Novo Nordisk and five companies who cracked the code to successful partnerships, one from each Nordic country. Thus illustrating the impressive power up this region is experiencing from coming together as one.

MODERATOR: **Ms. Helena Strigård** - CEO, SwedenBIO

SPEAKERS:

- **Mr. Olivier Duchamp** - Managing Director, NLSDays - VP International BD & Promotion, SwedenBIO
- **Dr. Karin Conde-Knape** - Senior Vice President Global Drug Discovery, Novo Nordisk
-
- **Ms. Sana Alajmovic** - Co-Founder & CEO, Sigrid Therapeutics
- **Ms. Maria Bech** - CEO, EpiEndo Pharmaceuticals
- **Mr. Michael Engsig** - CEO, Nykode Therapeutics
- **Dr. Christian Grøndahl** - Co-founder & CEO, SNIPR Biome
- **Mr. Prateek Singh** - CEO, Finnadvance

- 10:36 Vicore Pharma** - Biotechnology - R&D Services
- 10:48 Mercodia** - Biotechnology - R&D Services

10:00 - 11:00

NLSDays fireside chat 1

Main
hall

Using innovative technologies to facilitate decentralized trials

HOSTED BY: **LINK Medical**

This fireside will be a deep dive into the benefits, challenges, and possibilities of decentralized trials today. You will hear how AlzeCure is using a decentralized approach on their pilot study treating peripheral neuropathic pain. Contributing to the study setup perspective, is the LINK Medical team including Gunnar Danielsson, Senior Regulatory Advisor and former GCP inspector, and Hedda Magnusson, Group Manager, Project Management. Also invited to the chat is Henrik Blombergsson, CEO of Viedoc. Viedoc is a leader in digital solutions for clinical trials providing a full suite of eSolutions including their innovative EDC system, eConnect and many other tools.

MODERATOR: **Mr. Kristofer Klerfalk** - Co-Founder & CEO, CoCreation Health Group

SPEAKERS:

- **Mr. Gunnar Danielsson** - Senior Regulatory Advisor, Link Medical Research
- **Ms. Hedda Magnusson** - Director Clinical Operations, LINK Medical Research
- **Mr. Henrik Blombergsson** - Co-Founder and COO, Viedoc
- **Dr. Märta Segerdahl** - Chief Medical Officer, AlzeCure Pharma

- 11:42 Augere Medical** - MedTech & Diagnostics
- 11:48 Neola Medical** - Biotechnology - Therapeutics & Diagnostics

Plenary
room

11:00 - 12:00

Super session 1

Diving into deep tech - From buzzword to benefit in life sciences

HOSTED BY: **Finland**

SPONSORED BY: **Boehringer Ingelheim**

Deep tech is technology that is based on the combined breakthroughs of both scientists and engineers who are tackling society's biggest problems together. As one would expect, health, life sciences, and environmental issues are the key areas of impact for deep tech. And the term itself functions as the umbrella under which all the previously listed buzzwords fall.

The Nordics, as we know, are leaders in both technology and life sciences, so it comes as no surprise that we are a growing hub for deep tech as well. Finland is already considered one of Europe's most deep tech-focused ecosystems, launching the Nordics' first deep tech-dedicated fund in 2019 with Voima Ventures. In fact, between Finland and Norway, 40% of venture capital is going into deep tech start-ups.

In this session, we will look at the investors who are driving forward deep tech sectors, the start-ups who are grabbing the attention (and money) of investors, and the larger companies who have integrated deep tech solutions to optimize both their science & business.

MODERATOR: **Mr. Pontus Stråhlman** - Partner, Voima Ventures

SPEAKERS:

- **Dr. David Sonnek** - CEO, Navigare Ventures
- **Dr. Matthias Degroote** - Applied Quantum Computing Scientist, Boehringer Ingelheim
- **Dr. Armend G. Hâti** - CEO & Co-founder, ClexBiol
- **Ms. Kaisa Helminen** - Chief Operating Officer, Aiforia Technologies

Main
hall

12:00 - 14:00

Lunch buffet

12:00 - 13:00

NLSDays fireside chat 2

Main hall

CO-HOSTED BY: **UK Science & Innovation Network** and **Cell and Gene Therapy Catapult**

The UK Science innovation Network and Cell and Gene Therapy Catapult are hosting two panel discussions to address two key issues affecting the advanced therapy industry. How to manufacture ATMP's sustainably and how to accelerate the ATMP industry locally.

Can we make Advanced Therapeutics sustainably?

- What we know about the Ecological impact of biotech manufacturing?
- What work needs to be done to quantify that impact?
- What technologies needs to be developed to help things run more efficiently?

How can we support and accelerate the Advanced Therapeutics industry in the Nordics and UK?

- How to strengthen the Nordics ATMP network at home and abroad?
- The Catapult model in the UK and lessons for the Nordics.
- Does the Nordics need a CCRM institute to accelerate the Cell and Gene Therapy industry?

MODERATOR: **Dr. David J. Sexton** - Collaboration Executive, Cell and Gene Therapy Catapult

SPEAKERS:

- **Dr. Eva-Karin Gidlund** - Head of Alliance and Innovation, NorthX
- **Mr. Klaus Langhoff-Roos** - CEO, StemMedical
- **Dr. Laura Ruiz** - Applications Lead, BiologIC

13:00 - 14:00

NLSInvest Rising Star pitches - Part 1/2

Main hall

20 Nordic Rising Star pitching in the arena

This year, NLSInvest includes the first-ever live NLSInvest: a new, pan-Nordic investment track that gathers the top 40 Nordic health and life science startups, offering them a platform for pitching innovations to potential investors and setting personal 1:1 meetings during the conference.

The pitching will be a competition and participating investors will contribute reflections for determination of the winners of the 2022 NLSInvest Grand Prize.

MODERATORS: **Ms. Iris Öhrn** - Investment Advisor Life Science, Business Region Göteborg & **Dr. Gunnar Ahlberg** - Chief Medical Officer , Sciety

14:00 - 15:00

Super session 2

Plenary
room

Vertical life science - How convergence is erasing silos

HOSTED BY: **Sweden**

SPONSORED BY: **AstraZeneca**

The further science and technology advance across different sectors, the closer those sectors come to one another – a strange paradox. In drug development, the abundant need to measure detailed biological data in patients receiving drug candidates has led to the development of the fields we now call precision medicine and diagnostics. In other technology explorations, the automotive industry is exploring the ability to measure the vital signs of drivers in order to avoid accidents. The need to push the frontiers of diagnostics is all-encompassing, and suddenly, industries never-before-aligned are merging and looking at the same problems. And they can help each other to solve it.

Sector convergence can be a strategic choice, as is the case with our speakers from AstraZeneca and Volvo Cars, two giants in their respective fields looking to innovate together. Sector convergence can also arise from individuals, often those with cross-disciplinary backgrounds, as they stumble across real world challenges that simply cannot be overcome without making use of the experience, tools, and techniques of different sectors. The story of the health tech / gaming company, Mindforce Game Lab, and the journey of their CEO, professor Emma Lundberg, is an exquisite example of how dedication to solve a problem for patients brought gaming and health care together.

During this session, we will also hear from pioneers within bio-convergence, showing how recent breakthroughs in combining fields has led to nothing less than a revolution in genomics, enabling DNA-sequencing to be done at a much lower cost and much higher pace than before, along with the mind-blowing possibilities opening up when connecting AI and Big Data to how we pursue diagnostics, develop new therapies etc.

.../...

15:00 - 16:00

NLSDays fireside chat 3Main
hall
Weathering the storm and riding the waves
Strategic planning and execution for growth
HOSTED BY: **Back Bay Life Science Advisors**

Life science development and investment require a long-term and consistent strategy. Prioritization, indication backup, regulatory strategies, in parallel or together, investment and indication diversification, and building organically and inorganically all contribute to a company's sustainability and insulation from the vicissitudes of markets and the inevitable pitfalls in technology development.

This session will highlight macroeconomic factors in the funding and dealmaking aspects of life science companies, the preparation for and realization of strategies across portfolio prioritization, partnering (the when and why) and the challenges and opportunities in cross border deal making.

MODERATOR: **Mr. Jonathan P. Gertler** - Managing Director, BioVentures MedTech Funds - Co-Founder, CEO & Managing Partner, Back Bay Life Science Advisors

SPEAKERS:

- **Dr. Sarah Fredriksson** - CEO, Aqilion
- **Mr. Stephan Christgau** - Founding Partner, Eir Ventures

Super session 3

Plenary
room

Vaccine crosslinks: From cancer to COVID

CO-HOSTED BY: **Norway, Oslo Cancer Cluster** and **The Life Science Cluster**

SPONSORED BY: **Eversana** and **Citeline**

EVERSANA™

Immune links between cancer and infectious diseases have long been evident, and have created the foundation for preventive, treatment-based, and tumor-specific cancer vaccines using technology originally positioned for infectious diseases. Likewise, since the start of the COVID-19 pandemic, companies globally have pivoted and reassigned their R&D and, as a result, we now have numerous breakthroughs, technology applications, and success stories of mRNA COVID-19 vaccines originating from the oncology space.

The ability for our industry to rapidly come together during a pandemic, across sectors, indications, and stages has shown that, big or small, the mutual need for one another exists. How do we continue to build a future of mutually stimulating approaches to infectious disease, immunology, oncology, and technology? We do this by connecting experts, by working to jointly to increase overall understanding of immune modulation and response, and by using technology such as ML / AI to identify and prioritize the selection antigenic determinants. We do this through collaboration.

Norway has proven to be leader in oncology, immunology – and in both answering today's pandemic needs, as well as working towards the possible pandemics of tomorrow. In this session, our Norwegian partners will lead the discussion on where this road is headed: what can we expect, what do we need, and how can we collaborate for the best possible outcomes?

A multi-omics approach to disease

HOSTED BY: **Iceland**

SPONSORED BY: **MSD**

Many are aware that “-omics” is derived from -ome, meaning “whole,” giving us one of our favorite focuses in life science: genomics. However, genomics is a single variable and is somewhat of a static snapshot of our biological status.

Multi-omics is a dynamic and pivotal step in delivering modern, personalised, precision medicine, and encompasses many foci: proteomics, epigenomics, transcriptomics, metabolomics, microbiomics, and, of course, genomics. Each -omic provides valuable information about and differences associated with an individual or disease state. However, the analysis of only one data type has its limitations. Multi-omics is the layered measurement and integration of these various foci of information to better understand mechanisms of disease, discover new druggable targets, and create more targeted medical interventions.

As life sciences gravitate towards personalised treatments and precision medicines, the “one size fits all” approaches of classic drug development no longer apply. The -omics field has been driven largely by technological advances that allow for cost-efficient, high-throughput analysis of biologic molecules at grand scale, thus enabling the discovery of new biomarkers and biological pathways, as well as better understanding of disease progression and drug resistance. However, big challenges exist in -omics with regards to large-scale data analytics requiring not only skilled manpower, but also substantial and difficult-to-find investments.

This session will be led by Iceland, a country with deep roots in -omics, from science to commercialization. In it, we will investigate the current explorations of Multi-omics in academic and business settings across the Nordics, and we will discuss the ways in which -omics plays a role in life sciences today vs. what the future holds in both funding and success.

CO-HOSTED BY: **Spark Finland**, **Spark Norway** and **Spark Denmark**

The success of Stanford University's SPARK Program has inspired universities across the globe to establish SPARK programs fostering and professionalizing academic innovation.

SPARK Finland, SPARK Norway and the newly established SPARK Denmark are part of the global SPARK family with a mission to translate state-of-the-art academic discoveries to new products and solutions.

The results from the Nordic SPARK programs so far have been impressive, with a common ambition to become even stronger together.

In this session the directors of the Nordic SPARK Programs will discuss with academic innovators (called SPARKees), investors and mentors how academic discoveries can be advanced to a commercial setting more efficiently, how the university – industry bridge can be strengthened and how investors can engage to advance the growing portfolio of investment opportunities emerging from the Nordic SPARK initiative.

MODERATORS: **Dr. Morten Egeberg** - Leader SPARK Norway, University of Oslo (UiO) & **Dr. Pasi Sorvisto** - SPARK Finland - Director, SPARK Europe

SPEAKERS:

- **Dr. Ditte Riber** - Program Director, SPARK Denmark
- **Dr. Esmaeil Dorraji** - Researcher, Institute for Cancer Research - Oslo University Hospital
- **Dr. Ali Areffard** - Disease Area Head Oncology, Bristol Myers Squibb Norway
- **Dr. Jana Buzkova** - COO & Co-founder, NADMED
- **Dr. Maria Vistnes** - Resident Doctor and Researcher in Cardiology, University of Oslo (UiO)
- **Dr. Georgina Askeland** - Investment Associate, Hadean Ventures

Gender science: Reproducing for the other 50%

HOSTED BY: **Denmark**

SPONSORED BY: **Ferring Pharmaceuticals**

Women make up 49.6% of the global population, yet biological sex is unequally represented across the life science ecosystem, from inception to market. Though numerous genetic and biological differences are well-known between the sexes for a multitude of chronic conditions and diseases, disparities exist: in basic research, with the use of predominantly male animal testing; in clinical research, where trials don't always include equal representation; and in fewer investments made in female-led and female-oriented companies, despite the fact that the femtech / women's health market holds massive potential with an expected growth to \$60B by 2027.

In addition, terminologies like femtech (coined by Denmark's own women's health start-up founder, Ida Tin) and women's health are niched, seen as representing only reproductive science and technologies. In actuality, these terms represent all conditions that are unique to, disproportionately impact, or impact the female sex differently and include drugs, devices, consumer products, softwares, and apps.

This session is the challenge to our industry, innovators, and investors: let's treat women's health as more than a niche category and put equal time, resources, and money where half our population exists. It's time we reproduce our efforts for the other 50%, for the benefit of all 100.

Join Seden

HOSTED BY: **Business Sweden**

Part 1: Join Sweden - Why international investors invest in Sweden

Innovative, science-based and transparent are some of the virtues of Swedish life science companies in the investor's eye. But how do we raise the awareness about the investment possibilities into Swedish life science? Syndication with a Swedish investor is one way. International investment promotion another.

Part 2: Join Sweden - The potential of Sweden's connected health ecosystem

Digitalisation has changed the way healthcare is planned, accessed, and delivered. Data and digital technologies are transforming healthcare networks, but the potential is only just being revealed and opportunities for growth are vast. Understanding the factors driving Sweden's connected health sector boom is the first step to leveraging opportunities for international investment and collaboration.

Follow the money - Investors leading the way to sustainability

HOSTED WITHIN THE **NLSINVEST TRACK**

SPONSORED BY: **DNB** and **Business Sweden**

All sectors need to deal with sustainability and the life science industry is no exception. As regulations are tightening in many countries, working on your sustainability profile has moved from a 'nice to do' to a 'must do' for companies within biotech, pharma and medtech, regardless of size. But there is also a pure business case for stepping up your game in the sustainability arena, as we will hear in this session. Not least since investors are increasingly evaluating life science companies on this parameter when they make their pick. If you want the money, and the strategic partnerships, you better work on that sustainability plan. But what exactly is that and what are investors looking for?

With our moderator, Ann Margrethe Platou, Analyst at DNB, and speakers from leading actors from the investors' scene, this session will give some concrete answers to life science companies on how to integrate sustainability into their business model.

MODERATOR: Ms. Anne Margrethe M. Platou - ESG Analyst, DNB Markets

SPEAKERS:

- **Ms. Sarah Thomas** - Portfolio Manager and Healthcare Analyst, BlackRock
- **Dr. Anna Gisselsson** - Investment Manager, Almi Invest
- **Mr. Patrik Ling** - Senior Analyst Healthcare, DNB Markets
- **Ms. Cecilia Nord** - Global Head of Sustainability, Sobi
- **Ms. Alice Mattsson** - Founder, Pharmista Technologies

Together, we can.

Pandemics, food insecurity, climate change. These are the challenges biotechnology is striving to tackle every day. But breakthroughs just don't happen by themselves. They — like all of us — need an advocate. BIO is that advocate. We are here to help pave the way for positive change. So together, we can make breakthroughs possible — and accessible — for all.

Where
breakthroughs
begin

Partnering

A photograph of a woman with brown hair and sunglasses on her head, smiling and holding a blue and white brochure. She is wearing a dark blue jacket and black pants. In the background, other people are walking through a trade show aisle with white booth walls. The image is partially obscured by a red vertical bar on the right side.

Citeline, formerly Pharma Intelligence, is thrilled to be both a Premium and Partnering Booth Sponsor at the Nordic Life Science Days 2022.

Citeline powers a full suite of complementary business intelligence offerings to meet the evolving needs of health science professionals, accelerating the connection of treatments to patients, and patients to treatments.

Please come and meet us at our booth X103 to learn more.

Or reach out to **Alex Harris** at alex.harris@informa.com or **+44(0)7920 086852** with any questions.

The Healthcare bank for the future

We are DNB – a major Nordic financial institution. As one of the world's largest banks in the healthcare sector, we understand the unique power of the Nordic creative force.

In the Nordics, we support and have a close relationship with incubators for innovative startups and global life science companies.

Globally, we're an advisor and trusted partner for large and medium sized life science companies.

We are passionate about bringing small companies and their leading technologies to the forefront of healthcare while helping our larger corporate clients find partnerships and acquisitions across geographies.

Welcome to visit us at NLSDays 2022!
We look forward to meeting you.
